

Statistical Appendix for Chapter 2

April 16, 2015

1 Data Sources and Variable Definitions

- Happiness score or subjective well-being (SWB): The survey measure of SWB is from the December 26, 2014 release of the Gallup World Poll (GWP), which covers the years from 2005 to 2014. Unless stated otherwise, it is the national average response to the question of life evaluations. The English wording of the question is “Please imagine a ladder, with steps numbered from 0 at the bottom to 10 at the top. The top of the ladder represents the best possible life for you and the bottom of the ladder represents the worst possible life for you. On which step of the ladder would you say you personally feel you stand at this time?” This measure is also referred to as *Cantril life ladder*, or just *life ladder* in our analysis.
- The statistics of GDP per capita in purchasing power parity (PPP) at constant 2011 international dollar prices are from the November 6, 2014 release of the World Development Indicators (WDI). The GDP figures for Taiwan are from the Penn World Table 7.1. Syria and Argentina are missing the GDP numbers in the November-6-2014 WDI but were present in earlier releases. We use the numbers from the earlier release, after adjusting their levels by a factor of 1.17 to take into account changes in the implied prices when switching from the PPP 2005 prices used in the earlier release to the PPP 2011 prices used in the latest release. The factor of 1.17 is the average ratio derived by dividing the US GDP per capita under the 2011 prices with their counterparts under the 2005 prices. The same 1.17 is used to adjust the Taiwanese numbers, which are originally PPP dollars at 2005 constant prices.
 - GDP per capita in 2014 are not yet available as of November 2014. We extend the GDP-per-capita time series from 2013 to 2014 using country-specific forecast of real GDP growth in 2014 from the OECD Economic Outlook (May-2014 release) for OECD countries, and World Bank’s Global Economic Prospects (June-2014 release) for the rest of the world. The GDP growth forecast is adjusted for population growth with the subtraction of 2012-13 population growth as the projected 2013-14 growth.

- Corruption Perception: The measure is the national average of the survey responses to two questions in the Gallup World Poll: “Is corruption widespread throughout the government or not” and “Is corruption widespread within businesses or not?” The overall perception is just the average of the two 0-or-1 responses. In case the perception of government corruption is missing, we use the perception of business corruption as the overall perception. The corruption perception at the national level is just the average response of the overall perception at the individual level.
- Healthy Life Expectancy (HLE). The time series of healthy life expectancy at birth are calculated by the authors based on data from the World Health Organization (WHO), the World Development Indicators (WDI), and statistics published in journal articles. The challenge is that the healthy life expectancy, unlike the simple life expectancy, is not widely available as time series. In the WHO’s Global Health Observatory Data Repository, the statistics of healthy life expectancy are reported only for the years of 2000 and 2012. In our effort to derive the time series of healthy life expectancy for our sample period (2005 to 2014), we use WDI’s non-health adjusted life expectancy, which is available as time series up to the year 2012, as the basis of our calculation. Using country-specific ratios of healthy life expectancy to total life expectancy in 2012, available from the WHO, we adjust the time series of total life expectancy to healthy life expectancy by simple multiplication, assuming that the ratio remains constant within each country over the sample period. Three countries/regions are missing due to the lack of health/total life expectancy ratio. One is Hong Kong. We calculate its ratio using relevant estimates in “Healthy life expectancy in Hong Kong Special Administrative Region of China,” by C.K. Law, & P.S.F. Yip, published at the *Bulletin of the World Health Organization*, 2003, 81 (1). Another is Puerto Rico. We set its ratio to the U.S. ratio of 0.886. The third is Kosovo, we set its ratio to the world average 0.868. The estimated life expectancy for Taiwan and the Palestinian Territories are available in “Healthy life expectancy for 187 countries, 1990 - 2010: a systematic analysis for the Global Burden Disease Study 2010,” by Joshua A Salomon et al, *The Lancet*, Volume 380, Issue 9859. Once we have the data, we use intrapolation and extrapolation to fill in the missing values (when necessary) and to extend the period to 2014.
- Social support (or having someone to count on in times of trouble) is the national average of the binary responses (either 0 or 1) to the question “If you were in trouble, do you have relatives or friends you can count on to help you whenever you need them, or not?”
- Freedom to make life choices is the national average of responses to the question “Are you satisfied or dissatisfied with your freedom to choose what you do with your life?”
- Generosity is the residual of regressing national average of response to the ques-

tion “Have you donated money to a charity in the past month?” on GDP per capita.

- Positive affect is defined as the average of three positive affect measures: happiness, laugh and enjoyment in the Gallup World Poll waves 3-7. These measures are the responses to the following three questions, respectively: “Did you experience the following feelings during A LOT OF THE DAY yesterday? How about Happiness?”, “Did you smile or laugh a lot yesterday?”, and “Did you experience the following feelings during A LOT OF THE DAY yesterday? How about Enjoyment?” Waves 3-7 cover years 2008 to 2012 and a small number of countries in 2013. For waves 1-2 and 8-9, positive affect is defined as the average of laugh and enjoyment only, due to the limited availability of happiness.
- Negative affect is defined as the average of three negative affect measures in all waves of Gallop World Poll. They are worry, sadness and anger, respectively the responses to “Did you experience the following feelings during A LOT OF THE DAY yesterday? How about Worry?”, “Did you experience the following feelings during A LOT OF THE DAY yesterday? How about Sadness?”, and “Did you experience the following feelings during A LOT OF THE DAY yesterday? How about Anger?”
- Variables in the expanded data set: Confidence in national government. This measure is from the Gallup World Poll. The English wording of the question is “Do you have confidence in each of the following, or not? How about the national government? (WP139)”.
- Variables in the expanded data set: “Most people can be trusted” from the Gallup World Poll. The question’s English wording is “Generally speaking, would you say that most people can be trusted or that you have to be careful in dealing with people?”.
- Variables in the expanded data set: “Most people can be trusted” from the 6-wave World Value Surveys. The question’s English wording is “Generally speaking, would you say that most people can be trusted or that you need to be very careful in dealing with people?” The measure is defined as the percentage of respondents saying that most people can be trusted, excluding those who did not provide an answer.
- Variables in the expanded data set: Democratic and delivery quality measures of governance are based on Worldwide Governance Indicators (WGI) project (Kaufmann, Kraay and Mastruzzi). The original data have six dimensions: Voice and Accountability, Political Stability and Absence of Violence, Government Effectiveness, Regulatory Quality, Rule of Law, Control of Corruption. The indicators are on a scale roughly with mean zero and a standard deviation of 1. We reduce the number of dimensions to two using the simple average of the first two measures as an indicator of democratic quality, and the simple

average of the other four measures as an indicator of delivery quality, following Helliwell and Huang (2008).

2 Coverage, Summary Statistics and Regression Tables

The December 26, 2014 release of the Gallup World Poll (GWP) covers a total of 1,112 WP5-year observations of happiness scores in the period from 2005 to 2014 involving 164 different WP5. WP5 is GWP's coding of countries, including some sub-country territories such as Hong Kong. Not all the countries and territories appear in all the years. Our analysis does not cover all of the country/territories that have valid happiness scores. Tables 1-3 show the WP5-year pairs that are covered. The 2012-2014 ranking of happiness scores includes 151 countries/territories that have the happiness scores in the 2012-2014 period, plus 7 countries/territories that have the happiness score in 2011 but not in 2012-14. Table 8 has the list of those 7 countries. The ranking by changes in the happiness scores from the 2005-2007 period to the 2012-2014 period covers 125 countries/territories. Table 12 has the list of countries/territories that are in the 2012-2014 happiness ranking (including the 7 that use 2011 survey), but are missing the the change ranking because they do not have happiness scores in the 2005-2007 period.

Regions: Some of the analysis includes dummy indicator for regions, namely Western Europe, Central and Eastern Europe, Commonwealth of Independent States, Southeast Asia, South Asia, East Asia, Latin America and Caribbean, North America and ANZ, Middle East and North Africa, and Sub-Saharan Africa.

Notes: 1). Standard errors in parentheses. *, **, and *** indicate statistical significance at 10 percent, 5 percent and 1 percent levels. All standard errors are cluster-adjusted at the country level. The row “e(N-clust)” indicates the number of countries. 2). See section “Data Sources and Variable Definitions” for more information.

Figure 1: Ranking of Happiness: 2012-14 (Part 1)

Figure 2: Ranking of Happiness: 2012-14 (Part 2)

Figure 3: Ranking of Happiness: 2012-14 (Part 3)

Figure 4: Predicted happiness and actual happiness in 2012-14

Note: These average actual (predicted) happiness scores by country/territory for the 2012-2014 period are weighted averages of the yearly averages by county/territory used in (predicted by) column (1)'s regression in Table 7. The yearly weights are the sums of Gallup-assigned individual weights by country/territory in that year.

Table 8: Countries/territories that have valid happiness scores in 2011 but not in 2012-2014

WP5 Country	Sample size in 2011
Mozambique	1000
Central African Republic	1000
Djibouti	986
Lesotho	998
Mauritius	997
Oman	1998
Swaziland	1000

Table 9: Decomposing the happiness difference between a hypothetical average country and Dystopia

	Average country	Dystopia	Explained excess happiness over Dystopia due to	Share of explained excess happiness over Dystopia due to
Happiness	5.38	2.1		
Logged GDP per capita	9.17	6.58	.85	.26
Social support	.8	.39	.99	.3
Healthy life expectancy	61.49	38.72	.63	.19
Freedom to make life choices	.72	.32	.43	.13
Generosity	.01	-.3	.24	.07
Perceptions of corruption	.74	.97	.14	.04
Sum of explained excess over Dystopia			3.28	1

Table 10: Decomposing the happiness difference between the group of top 10 countries/territories and the group of bottom 10 countries/territories in the ranking of happiness scores

	Top 10	Bottom 10	Difference in happiness due to	Share of explained difference due to
Happiness	7.43	3.37		
Logged GDP per capita	10.67	7.48	1.04	.34
Social support	.94	.61	.8	.26
Healthy life expectancy	71.56	49.9	.6	.19
Freedom to make life choices	.93	.64	.3	.1
Generosity	.19	.02	.14	.04
Perceptions of corruption	.38	.71	.21	.07
Total explained difference in happiness			3.08	1
Total difference in happiness			4.06	

Table 11: Imputed missing values that are used for decomposing the 2012-2014 happiness scores

Country	GDP per capita	Social support	Perceptions of corruption	Generosity	Freedom	Healthy life expectancy
Argentina	2011 data			Predicted by $\text{donation-a-b}*\ln(\text{gdp})^1$		
Bahrain				Predicted by $\text{donation-a-b}*\ln(\text{gdp})$ (donation in 2012-14 is missing, thus 2011 value is used)	2008 data	
China			Russia's data			
Iran			2008 data			
Jordan			2009 data			
Kuwait			Corruption in business in 2011	Predicted by $\text{donation-a-b}*\ln(\text{gdp})$ (donation in 2012-14 is missing, thus 2010 value is used)	2011 data	
Laos			2011 data			
Myanmar	PPP in 2013 dollar (CIA estimated) adjusted to PPP in 2011 dollar			Predicted by $\text{donation-a-b}*\ln(\text{gdp})$		
North Cyprus	Cyprus's data			Predicted by $\text{donation-a-b}*\ln(\text{gdp})$		Cyprus's data
Oman		Saudi Arabia's data	Saudi Arabia's data			
Qatar			2009 data			
Saudi Arabia			2009 data			
Somaliland Region	Ethiopia's data			Predicted by $\text{donation-a-b}*\ln(\text{gdp})$		Ethiopia's data
Taiwan	2010 data			Predicted by $\text{donation-a-b}*\ln(\text{gdp})$		
Turkmenistan			Uzbekistan's data			
United Arab Emirates			Corruption in business in 2010	Predicted by $\text{donation-a-b}*\ln(\text{gdp})$ (donation in 2012-14 is missing, thus 2011 value is used)		

Notes: The coefficients a ($=-0.409$) and b ($=-0.078$) are generated by regressing national-level donations on log GDP per capita in a pooled OLS regression.

Figure 5: Changes in Happiness: from 2005-07 to 2012-14 (Part 1)

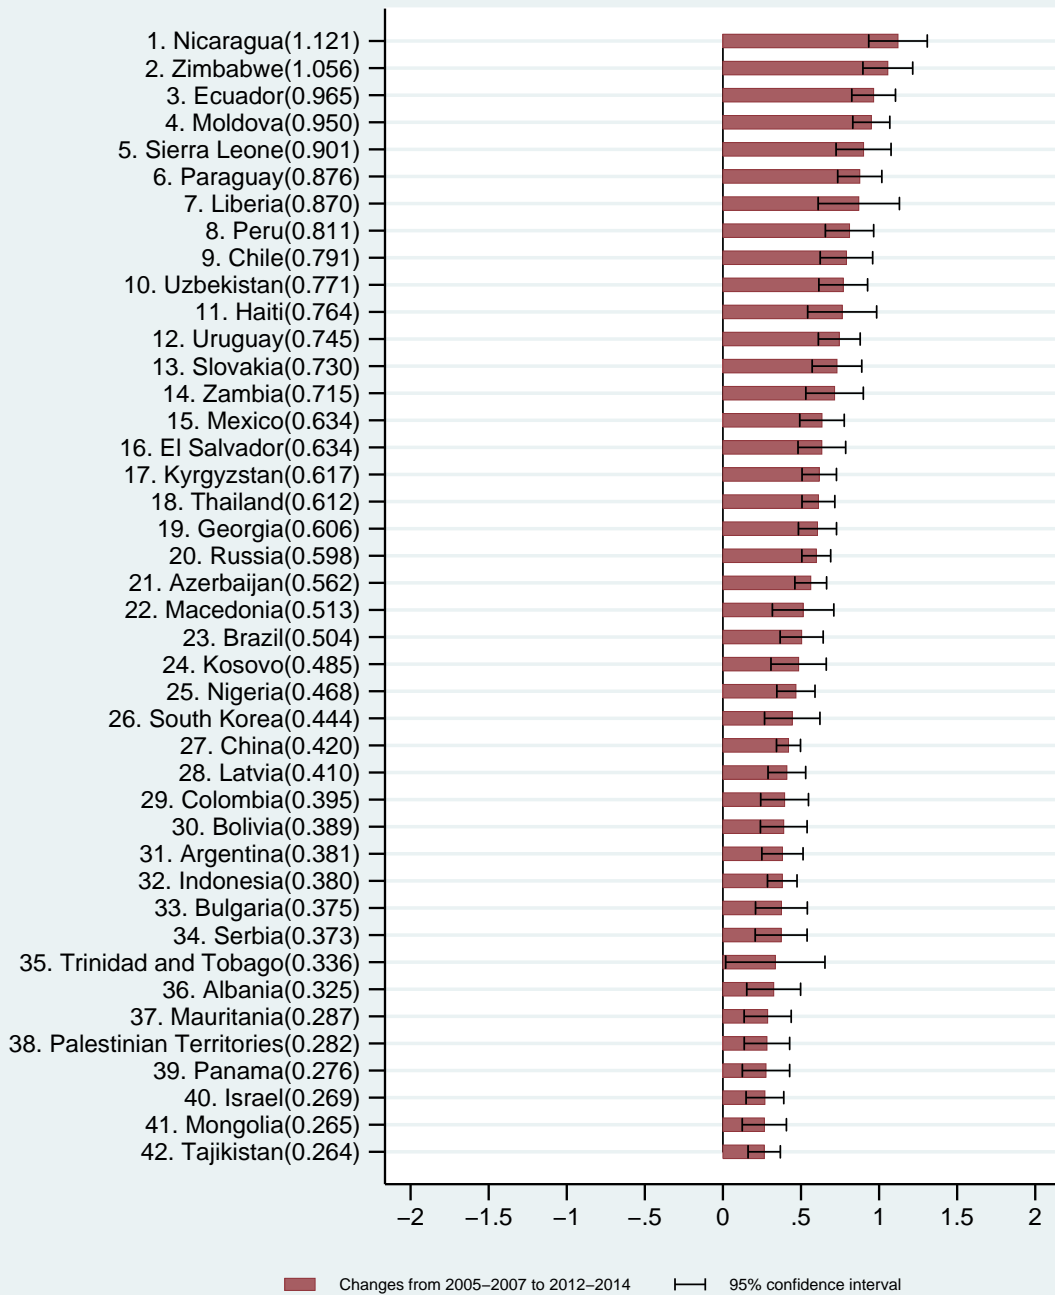

Figure 6: Changes in Happiness: from 2005-07 to 2012-14 (Part 2)

Figure 7: Changes in Happiness: from 2005-07 to 2012-14 (Part 3)

Table 12: Countries/territories that are in the 2012-2014 happiness ranking (including the 7 that use 2011 survey), but do not have ladder observations in the 2005-2007 period

Afghanistan
Algeria
Angola
Bahrain
Bhutan
Burundi
Comoros
Congo (Brazzaville)
Congo (Kinshasa)
Djibouti
Ethiopia
Gabon
Guinea
Iceland
Iraq
Ivory Coast
Lesotho
Libya
Luxembourg
Malta
Mauritius
Morocco
Myanmar
North Cyprus
Oman
Qatar
Somaliland region
Sudan
Suriname
Swaziland
Syria
Tunisia
Turkmenistan

Table 13: Imputed missing values for the 2005-2007 period that are used for decomposing the happiness changes from 2005-2007 to 2012-14

Country	Perceptions of corruption	Generosity	Freedom
China	Russia's data		2008 data
Egypt	2009 data		
Madagascar	2008 data		2008 data
Rwanda		Predicted by donation-a-b*ln(gdp) (donation in 2005-07 is missing, thus 2008 value is used) ¹	
Yemen	Corruption in government in 2007		

Notes: 1). The coefficients a ($=-0.409$) and b ($=-0.078$) are generated by regressing national-level donations on log GDP per capita in a pooled OLS regression. 2). To decompose the changes, we also use the imputed values for the 2012-14 period listed in Table 11 in addition to the imputed values in this table.

Figure 8: Actual and predicted changes in happiness from 2005-07 to 2012-14

Note: Defining predicted changes in happiness due to changes in the six factors: Step 1. Take periodical averages (2005-07 and 2012-14, respectively) of the six factors in the survey data. Step 2. Take difference between the two periods for each of the factors. Step 3. Multiply the differences with corresponding coefficients on the factors in Table 2.1. Step 4. Take the summation of the products from the previous step. The resulted sum is predicted change in ladder due to changes in the six factors.

Figure 9: Actual and predicted changes in happiness from 2005-07 to 2012-14 at the regional level

Note: This plot at the regional level shows weighted averages of the actual and predicted changes shown in figure 8. The weights for deriving the regional averages are average population from 2005 to 2013.

	Period 2012-2014	Period 2005-2007	Explained changes in happiness due to
Happiness	6.139	5.738	
Logged GDP per capita	9.247	9.098	.049
Social support	.853	.87	-.041
Healthy life expectancy	64.317	62.963	.037
Freedom to make life choices	.788	.738	.053
Generosity	-.017	.029	-.036
Perceptions of corruption	.782	.809	.017
Sum of explained changes in happiness			.079
Total changes in happiness			.4

Note: The following countries/territories are in this group: Argentina, Bolivia, Brazil, Chile, Colombia, Costa Rica, Dominican Republic, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Jamaica, Mexico, Nicaragua, Panama, Paraguay, Peru, Trinidad and Tobago, Uruguay, Venezuela,

Table 24: Decomposing changes in happiness from 2005-2007 to 2012-2014, equal weight for each country/territory, for North America and ANZ

	Period 2012-2014	Period 2005-2007	Explained changes in happiness due to
Happiness	7.279	7.388	
Logged GDP per capita	10.642	10.6	.014
Social support	.932	.962	-.07
Healthy life expectancy	71.306	70.261	.029
Freedom to make life choices	.902	.917	-.016
Generosity	.266	.261	.004
Perceptions of corruption	.462	.441	-.013
Sum of explained changes in happiness			-.053
Total changes in happiness			-.109

Note: The following countries/territories are in this group: Australia, Canada, New Zealand, United States,

Table 25: Decomposing changes in happiness from 2005-2007 to 2012-2014, equal weight for each country/territory, for Middle East and North Africa

	Period 2012-2014	Period 2005-2007	Explained changes in happiness due to
Happiness	5.447	5.712	
Logged GDP per capita	9.817	9.76	.019
Social support	.78	.838	-.138
Healthy life expectancy	64.38	63.099	.035
Freedom to make life choices	.659	.668	-.01
Generosity	-.06	-.053	-.006
Perceptions of corruption	.718	.684	-.021
Sum of explained changes in happiness			-.121
Total changes in happiness			-.265

Note: The following countries/territories are in this group: Egypt, Iran, Israel, Jordan, Kuwait, Lebanon, Palestinian Territories, Saudi Arabia, Turkey, United Arab Emirates, Yemen,

Table 26: Decomposing changes in happiness from 2005-2007 to 2012-2014, equal weight for each country/territory, for Sub-Saharan Africa

	Period 2012-2014	Period 2005-2007	Explained changes in happiness due to
Happiness	4.151	4.16	
Logged GDP per capita	7.605	7.44	.054
Social support	.727	.705	.053
Healthy life expectancy	48.595	45.305	.091
Freedom to make life choices	.686	.66	.027
Generosity	-.013	.024	-.029
Perceptions of corruption	.79	.782	-.005
Sum of explained changes in happiness			.191
Total changes in happiness			-.009

Note: The following countries/territories are in this group: Benin, Botswana, Burkina Faso, Cameroon, Central African Republic, Chad, Ghana, Kenya, Liberia, Madagascar, Malawi, Mali, Mauritania, Mozambique, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, South Africa, Tanzania, Togo, Uganda, Zambia, Zimbabwe,

Table 27: Decomposing changes in happiness from 2005-2007 to 2012-2014 by region, weighting countries/territories within a region with their population size

	Changes in average happi- ness	Total ex- plained changes due to the six factors	Changes due to: GDP per capita	Changes due to: Social support	Changes due to: Healthy life ex- pectancy	Changes due to: Free- dom to make life choices	Changes due to: Gen- erosity	Change due to: Percep- tions of corrup- tion
Western Europe	-.251	-.1	-.004	-.066	.046	-.034	-.061	.018
Central and Eastern Europe	.088	.054	.044	-.051	.048	.004	-.002	.009
Commonwealth of Independent States	.409	.287	.054	.048	.077	.039	.044	.024
Southeast Asia	.26	.238	.079	.074	.032	.054	.002	-.004
South Asia	-.467	.031	.095	-.142	.041	-.037	.058	.016
East Asia	.348	.133	.144	.003	.025	-.047	-.004	.012
Latin America and Caribbean	.49	.029	.049	-.054	.04	.011	-.045	.027
North America and ANZ	-.21	-.162	.007	-.117	.027	-.051	.021	-.049
Middle East and North Africa	-.529	-.15	.041	-.171	.043	-.063	.015	-.014
Sub-Saharan Africa	.061	.192	.051	.058	.093	.009	-.011	-.009

Table 28: Number of countries/territories that experienced statistically significant changes in happiness scores from 2005-2007 to 2012-2014

	Total number of coun- tries/territories in sample	Number of significant positive changes	Number of significant negative changes
Western Europe	17	1	10
Central and Eastern Europe	17	7	1
Commonwealth of Independent States	11	9	2
Southeast Asia	8	4	2
South Asia	5	1	3
East Asia	6	3	1
Latin America and Caribbean	21	15	2
North America and ANZ	4	0	2
Middle East and North Africa	11	5	6
Sub-Saharan Africa	25	8	12
